Project n.º 45211 - I&DT - Individual

Support under the FEDER Incentive System

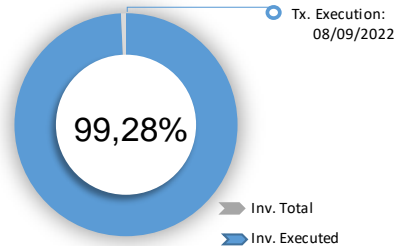

Start date: 01/12/2019

End date: 28/02/2022

Total eligible cost: 534 294,62 €

EU financial support: 286 108,27 €

National public financial support: n.a.

Portugal - North

Reinforce Research, technological development and innovation

Project summary

This innovative project aims to use seamless technology applied to textile structures based on coated fibers and/or additives with non-Newtonian fluids, which gives them an auxetic behavior and greater energy absorption capacity. The company has outlined a set of actions that will enable it to achieve a set of strategic objectives in the medium and long term that will coherently contribute to the mission and vision outlined, namely: increase turnover in the area of technical textiles in 2022, establish two new partnerships with SCT entities, launching an innovative product in the area of personal protection and accessing strategic international markets.
